

Name: Anonymous  
School: Troy High School  
Grade: Freshman  
Book Title: Ward D  
Book Author: Frieda McFadden  
Rating: 5

Ward D by Freida McFadden is a psychological thriller that follows Amy Brenner, a medical student assigned to an overnight shift on a locked psychiatric ward called Ward D. Initially, Amy anticipates a routine experience as part of her medical training. However, as the night progresses, unsettling events occur. Trust becomes elusive among the staff, patients, and even Amy herself, compelling her to uncover the truth before time runs out. The novel maintains suspense and tension, prompting readers to question reality until the conclusion.

I found this book highly engaging due to its consistent suspense and the way it maintained uncertainty throughout the narrative. I appreciated that each chapter concluded with a cliffhanger, which made it challenging to pause my reading. Amy, as the protagonist, was compelling because of her determination to endure the night at Ward D despite her fears and personal history. Spider-Dan emerged as one of my favorite characters; although he initially appeared to be a lighthearted individual with an interest in superheroes, his significance in the story exceeded my expectations. The novel evoked curiosity and surprise, as trustworthiness was constantly in question and several plot twists were genuinely unpredictable. However, I found that some plot twists occurred so rapidly that they were occasionally difficult to follow.

I would definitely recommend Ward D to anyone who enjoys psychological thrillers, mysteries, or books with unexpected plot twists. Readers who like stories that keep them guessing and build suspense until the end would probably enjoy this book the most. It reminded me of other thriller novels because it constantly made me question what was true and who seemed trustworthy. Overall, I think it is an exciting, fast-paced read that is difficult to put down and would be a great choice for anyone who enjoys suspenseful books.
